PORT NOTICE TO MARINERS

NO. 10 OF 2019

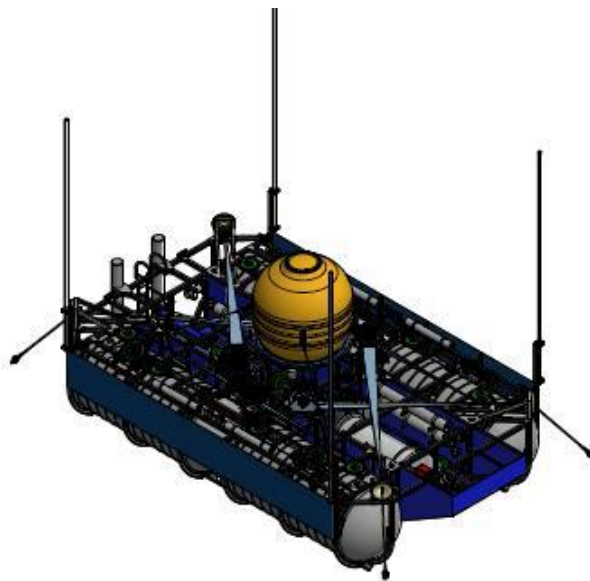

PROTOTYPE ENERGY DEVICE RE-DEPLOYMENT

NOTICE IS HEREBY GIVEN that the wave energy device that was removed in September 2018 is being re-deployed in the FAB Test Site in position $50^{\circ} 06'.273$ N, $004^{\circ} 59'.639$ W. The anchor work is to commence from Friday 17th May and the device deployment is scheduled to begin on Monday 20th May 2019 by the vessel's Boy Brendan and Swallow.

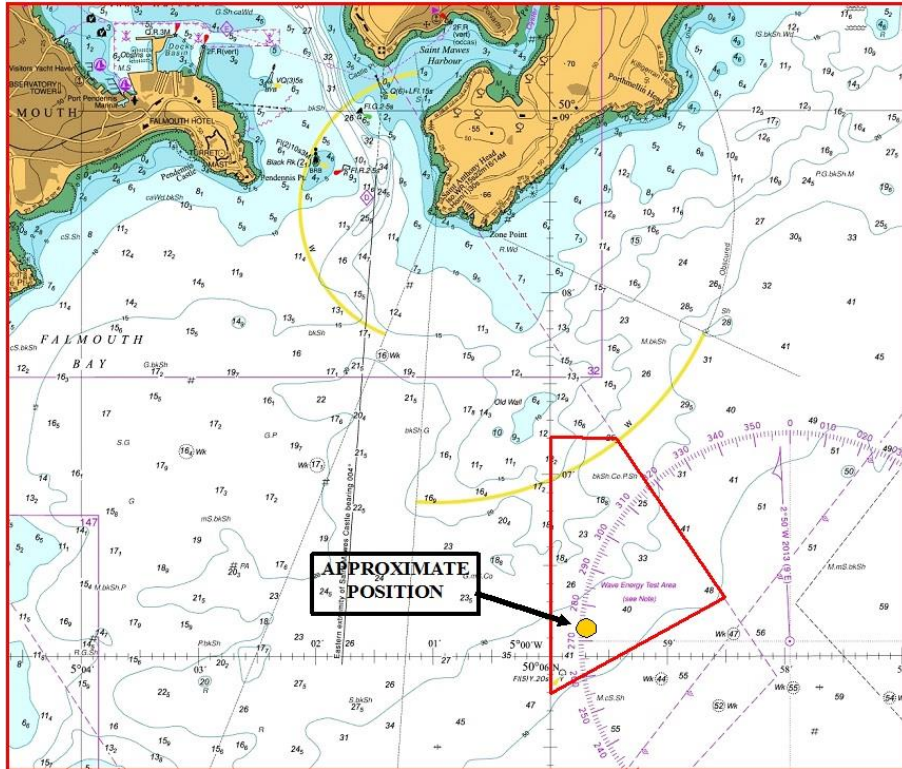

When in operating mode, the device will operate sub-surface and will not have surface marks indicating its position.

To mark the area of device operations, a pattern of four cardinal marks lit as described below is deployed in the following positions:

North Cardinal	$50^{\circ} 06'.327$ N	$004^{\circ} 59'.641$ W	Flash Q 1s
East Cardinal	$50^{\circ} 06'.274$ N	$004^{\circ} 59'.555$ W	Flash VQ (3) 5s
South Cardinal	$50^{\circ} 05'.165$ N	$004^{\circ} 59'.632$ W	Flash VQ (6) + LF1 10s
West Cardinal	$50^{\circ} 06'.272$ N	$004^{\circ} 59'.723$ W	Flash Q (9) 15s

Deployment operations will be undertaken by the lead vessel Boy Brendan which will maintain continuous listening watch on VHF Channels 17 and 09. It will exhibit lights and shapes required for a vessel restricted in its ability to manoeuvre.

Mariners are requested to keep well clear of the Boy Brendan during deployment operations; there will be diving activity during this deployment.

When deployment is completed mariners are advised to remain clear of the operating area marked by the pattern of cardinal marks.
